

Hidden Toolbox

Run out of room for a toolkit on your Lomax after packing for a trip?—"Must take this just in case" scenario? What about the space under the boot floor? On a 223 that the space opposite the swing arm. Use this empty space!

Obtain a 5ltr (1 Gall) plastic bottle from oil, distilled water, orange juice etc, hold it in place with a 'T' hinge, meant for a shed door. Just cut a flap door in the plastic can, fill it with 'stuff', bend the hinge to fit (add a cross piece support to stop contents falling out. See diagram
