

From Tony Taylor:

A Simple Plate For Adapting Leather or Wood Rim
Steering Wheels to the Citroen Column

I FOUND THE LID OF A MARGARINE
CARTON THAT NEATLY FITTED THE
CENTRE OF THE WHEEL AND COVERED
THE COLUMN BOLTS.

To CUT HOLE

MARK OUT SIZE REQUIRED.
DRAW A LINE APROX. $\frac{1}{16}$ "
INSIDE REQD. SIZE.

CENTRE PUNCH AT APROX. $\frac{1}{8}$ " INTERVALS.
DRILL ROUND $\frac{3}{32}$ " DIA. THEN INCREASE DRILL
SIZE UNTILL CENTRE DROPS OUT, FILE TO
CLEAN UP.

From Pete Clarke:

An Alternative Steering Column Grommet

I have noticed that most people with a Lomax seem to have an oversize hole in the GRP bulkhead at the base of the steering column. The solution is simple. Buy a sink plunger from Woolworths and cut around the rubber at the handle end. It makes a great grommet !

An Outer Drive Shaft Gaiter works very well also P.L.
